

Dry Tortugas

Dive the Dry Tortugas Ecological Reserve aboard the M/V Spree
The M/V Spree is a 100-ft liveaboard based in Key West, FL

70 miles west of Key West, Florida, lie some of the most **spectacular reefs in the Florida Keys**. Most dive sites rise to 50 feet from the sand 80 feet below and are home to over 250 species of fish, thousands of invertebrates, sharks, rays and turtles. The USNS Gen. Hoyt S. **Vandenberg** is our last stop on the way home, a mere 40 minutes from our dock.
